

## NO DAM

To who it may concern,

My name is [REDACTED]. I am nine and live in Modanville with my family and we are deeply concerned in the making of the dam. We care for the nature around us and you should to. Listen to the people of Dunoon because they are saying NO DAM. Making the dam will affect the people the culture the animals and the environment. The koalas the platypus and all the other animals you could destroy are depending on your decision. If you go onward with your scheme you will put many lives in danger and risk the destruction and loss of the habitat. The Ecosystem would be disrupted and we could lose more of our precious koalas who's numbers are already down because of the bush fires. Live with the nature and care for it. Water tanks for example are much better for the environment. If you build the dam you risk the big scrub. I am the next generation and I have a right to have a say in what happens to our environment. Please consider what I have said,

Yours sincerely,

[REDACTED]
