Subject: Submission Re Western Regional Water Strategy

Dear Sir/Madam,

Please accept this e-mail as my submission regarding the Western Regional Water Strategy.

NSW is in a difficult situation. Australia is in a difficult situation. But the whole world is in a difficult situation.

The recent report of the Intergovernmental Panel on Climate Change confirms that we need fundamental and systemic change.

Water is life and we cannot afford any further destruction of our river systems for private profits.

My concern is that we, as a community, develop an honest analysis of our situation before we decide collectively what is to be done.

I commend and support the submissions by the Inland Rivers Network and the Environmental Defenders Office.

Sincerely yours,
