

Nelson Parade REMEDICATION

9 DECEMBER 2009

Dear Resident,

Preparation is well underway for the remediation of 7, 9 and 11 Nelson Parade, Hunters Hill.

Site clearing complete

The removal of overgrown vegetation from 7, 9 and 11 Nelson Parade is complete. This was an important step in the process as site clearing is necessary to prepare the site for remediation.

The clearing of vegetation means that the Australian Nuclear Science and Technology Organisation (ANSTO) can access previously covered areas to complete site testing.

Remediation Action Plan and Environmental Assessment

There are two key approvals required to allow remediation work to start on site:

1. The Remediation Action Plan (RAP) will be prepared by the main remediation contractor and will be submitted to the Environmental Auditor and then the Department of Environment, Climate Change and Water. Prior to submission, the State Property Authority and the main contractor will consult with the local community.

2. The Environmental Assessment (EA) will be prepared by the environmental consultant. The EA will be submitted to the Department of Planning who will place the documents on public exhibition. The State Property Authority and the EA consultant will also consult with the community on this document.

Tender process

The Authority will soon be going to tender for the main remediation contractor who will develop the RAP in preparation for remediation starting next year. A specialist consultant will also soon be appointed to prepare the EA. We will continue to keep you informed of this process.

The remediation contractor and environmental consultants will be selected following an Expression of Interest and tender process. The contractor will work closely with an expert panel to ensure the best possible outcome for site remediation.

Tenders for both the remediation contractor and other specialist consultants will be awarded early next year. The State Property Authority will keep stakeholders informed of these appointments when they are made.

How do I find out more?

For more information on the remediation process please visit the Nelson Parade project webpage at www.spa.nsw.gov.au
