Subject: NSW Health submission on DPE's consultation draft: Regulatory framework for local water utilities

Dear DPE

Thank you for the opportunity to provide the following comments on the Department of Planning and Environment's Consultation draft: Regulatory framework for local water utilities:

- NSW Health supports improved coordination and collaboration of local water utility regulators and will continue to work with DPE to ensure that regulatory interactions and interdependencies are understood and opportunities to coordinate regulatory efforts are realised.
- NSW Health values and supports the larger role water quality risk management will have in informing strategic planning and technical approvals.

Regards
Katrina
