Subject: Creek closure

To Whom It May Concern

We are riparian land holders with properties adjoining both the Duck and Gunningbar Creeks.

These creeks represent our livelihood. They not only supply stock and domestic and irrigation water they are stock proof borders with adjoining neighbours. They are also a very important wildlife habitat for our diverse birds, fish and animals.

The closure of these creeks would have serious detrimental effects to our environment.

Hence we strongly object to this proposal,

Yours sincerely
