

Water engagement

Past stakeholder and community engagement activities from January 2024

Water is one of our most valuable natural assets. The department has a responsibility to the people of NSW to ensure that our water is managed equitably and transparently now and into the future. Our stakeholders are those groups and individuals who could be affected by our activities.

We regularly create opportunities to hear from and meet with our stakeholders to build shared understanding, hear insights on water matters, and to provide input on policies, plans, and other relevant documents. Our [engagement policy](#) describes how we will complete this engagement.

An overview of our past meetings, exhibitions, and other public engagement activities is provided below. This is a snapshot of our activities at a point in time and updated quarterly.

To see our current engagements, please visit to [our website](#).
