Hey There,

I am writing to you all, to state my strong objection to you damming the Channon and Dunoon. I am a songwriter and live a peaceful life along the creeks of Tuntable Creek. I don't know all the big words to use to say 'no' and don't have a degree in this kind of thing. I do know in my heart that it is a very bad idea to make a large Dam in my local area. Not only will it affect the creeks that we love and use to cool down in the summer months, it will destroy the creeks that connect to it and destroy all the native life that rests and lives in there, that has a home there.

What about the local people that live on that land and own the land?

It's 2020, a Dam is an old option, come on guys wake up. It's the future of smart water and earth loving choices.

A Dam is a billion dollar waste of time for us all, not to mention the cultural heritage that you will flood and drown in your narrow minded decision to make a dam, for security? What are you afraid of? Most of us around here are on Tank Water and we're fine. We survived the bushfires and the seasons of no rain.

Why not follow the path of least damage to the environment, isn't that what we're all learning this year after COVID and the Climate Change rallies that have been going on all over the world? How is this any different?

You've done great things so far, but my heart and spirit tell me that this is a very bad decision for the future generations, especially when there are far cheaper and more earth loving options. Imagine having a dam built in your town? The trucks speeding along the narrow, winding roads and all the increased traffic causing havoc not only to our roads but to our waterways.

I strongly object to the proposed Channon-Dunoon Dam, we have one already, it's called Rocky Creek.

I have written a protest song, and will write many more. We stopped the CSG at Bentley and we will stop you.

Thanks for your time,

Yours sincerely, [REDACTED].

All the best,

Love & light
