SUBMISSION - FNC Water Strategy

SUBMISSION - FNC Water Strategy

Hello,

[REDACTED] here , I have lived and worked in the northern rivers area for close to a decade now.

I appreciate work done so far by DPIE in developing the Far North Coast Water Strategy.

I would like to suggest though the Strategy must not rely too much on Rous's Future Water 2060 project, especially because that plan hinges on the contentious Dunoon Dam, and that the Dunoon dam should no longer be an option in the strategy.

I do not agree with the proposed DAM. Species and habitats will be destroyed as well as Aboriginal heritage. There has also been no interest in majority of locals.

Please reconsider , we do not want this, plant more trees instead.

Kind Regards,

[REDACTED]
